

Jukani PREDATOR PARK

•the closest you will ever get to the world's most fearsome hunters!!

Right in the heart of the Garden Route , just outside the picturesque town of Mossel Bay lies one of the most unique interactive wildlife predator parks on earth – dedicated to the preservation and well being of the world's most inspiring carnivores by changing attitudes and changing minds – come, take a Jukani Predator Park tour!

You will arrive filled with fear – and leave awe inspired! ABOUT JUKANI PREDATOR PARK

Jukani Predator Park is the brainchild and a lifetime's dream realized for Jurg and Karen Olsen whose relationship with carnivores of all sizes, from the mighty Tiger of Asia, to the cunning jackal of the semi desert Cape Karoo has grown to almost legendary proportions.

Singlehandedly, Jurg and Karen have assembled a cast of carnivores people at once either hate, love, despise or fear and each of these wondrous creatures does its share to change perceptions and allow those who come close for even an hour or so to leave with a new respect and a new will to fight for predators and wild creatures everywhere to have the right to land, freedom and a future that will see them enduring for our grandchildren's children – and beyond!

Each of the animals at Jukani Predator Park is special – an ambassador for its kind, an individual that somehow seems to realize that it has a role to play in preserving its species. All are wild animals, none have had their spirits broken, none have been tamed, and yet when you see how they welcome and accept Jurg, Karen and their staff amongst them, you will begin to realize that something very special happens here between predator and man! "I was absolutely amazed when Jurg entered the lions den, and I was sure that the pride male would tear him to pieces when he sat down amongst the lionesses – I could not believe what a relationship these animals have with this man – I will never forget it";

Jann Bader.
Visitor June 2008.

"I never imagined hyenas had personality, nor that they aren't simply scavengers! I never dreamed I would actually touch one. Thank you Jurg and Karen for a life changing experience";

Frenette Bezuidenhout.
South Africa.

"Natuurlik was die leeus and die Luiperds wonderlik, maar ek moet net sê dat die ervaring met die rooikatte absoluut opwindend was – as jy hulle ontmoet kan jy sien hulle kan glad nie groot skape aanpak nie";

Jurie Van Graan.
Zimbabwe.
